Summary

Final-year Electronics and Communication Engineering student with strong foundations in Data Structures, Algorithms, Java, and Full Stack Development. Passionate about building scalable software solutions and solving real-world problems through technology.

Education

Degree	Institute/Board	CGPA/%	Year
B.Tech (ECE)	Lakshmi Narain College of Technology (LNCT), Bhopal	7.21/10	2023–2027
12th	R.B. Jalan Inter College, Sahila, Sonki, Darbhanga	68.4%	2022
10th	Gyan Bharti Public School, Lalbagh, Darbhanga	62.4%	2020

Projects

Edge-AI Vision Pipeline for Object Detection

- Built a real-time object detection system using YOLO and OpenCV for live video processing.
- Improved detection accuracy through image preprocessing and optimized inference performance.
- Explored ONNX Runtime for lightweight deployment on edge devices.
- Managed project development using Git and GitHub.

Technologies: Python, OpenCV, YOLO, ONNX Runtime, Git

AI Interview Platform

- Developed the backend of an AI Interview Platform using FastAPI with a modular architecture.
- Built RESTful APIs for authentication, resume upload, and interview management.
- Integrated SQLite with SQLAlchemy for efficient database operations.
- Implemented secure authentication using JWT and bcrypt.

Technologies: Python, FastAPI, SQLite, SQLAlchemy, JWT

Skills

Programming Languages	Java, JavaScript
Technologies/Frameworks	ReactJS, Node.js, Express.js, Spring Boot, JPA, HTML, CSS
Developer Tools	VS Code, Eclipse, IntelliJ IDEA, PyCharm, Git, GitHub, Postman
Databases	MySQL, MongoDB
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming, Problem Solving
Coursework	Operating Systems, Computer Networks, DBMS, Object-Oriented Programming

Certifications

- Cisco Networking Academy Certifications
- FutureSkills Prime Learning Programs
- SmartBridge Technical Training and Workshops
- Java Programming and Object-Oriented Programming Training
- Solved 150+ Problems across Platforms
